resident evil 2 - claire costume noir

Fun game, reminds me of Peggle and Bejewled 3. Not games that You can play 8 hours straight, but a good timekiller.
. Fairly quick tech demo doesn't take long to find all the content, but for a free game you can't ask much more. Makes you wish for a more fully developed game! That said the graphics are beautiful, and some spells are really fun, the gateways to other worlds are downright intimidating. Really cool stuff, worth a play.. The good:
1- This is a short RPG maker game. - I don't mean it is bad because of this -.
2- Some parts of the game are polished well: for example the animation during battles.
3- no random encounters. You only fight an enmy when you collide with it - which i think is good -.

The bad:
4- Sadly it seems it suffers from the same problem that many other rpg maker games have: the game is not balanced. I mean you could quickly level up and breeze through the game and care not for any strategy while fighting.
5- Another issue is the story: which is very poor.
6- No side quests
7- Finally I got the feeling that this game needs some polish before releasing.

I am really feeling bad for giving this game a negative review, but this is how I felt while playing it. I think this game could have been much better if it had a better story.
. Very impressive. I recomend. Please do more!. I didn't understand much when I played, but it is a fine game, clear screen, need more improve and... need more instruction and tutorial much.. What the ♥♥♥♥. It's easier to post the things that are good about this game, so here it goes...you can turn it off.

Tried to sink the Bismarck using only 6 sardines 10/10. For those who complain about spending another 5 bux....
I bought C&C Tiberiun Sun in '98 I think for around 50-60 bux and then the firestorm addon was another 30-40 bux. These guys havent exactly been making games and probably need staff. That takes money. If you know anything at all about game dev, and support these guys, you'll have spent the money and be glad you did. :P. This is an interesting one. I had played Doodle God very early on as a flash game with little updates, and never played the mobile one. So coming from that it's a huge upgrade with a bunch of stuff to do and is very fun.

HOWEVER, while the game itself is good, it does two things that negatively effect it.

#1: As you can see from all the negative reviews already, there are micro transactions in the game. They all cost $0.99 USD, cheap, but not needed in the game. While I myself don't have a problem with this because it doesn't effect gameplay at all basically, it's good to keep in mind that it's in bad taste for a game that's already asking for money up front. Just a bad business practice, and if you don't like that don't buy the game.

#2: It's a direct mobile port. From the text saying "tap" to even the app pop ups saying "RATE OUR GAME". While it doesn't run bad on PC and the buttons still feel ok for the most part, it's still annoying that they just ported the game over.

In my personal opinion I like this game. I don't mind the micro transations because they don't effect the game, they just make it a bit easier if you want to buy them. I also don't mind the direct port from mobile since the buttons are still ok.

As someone who never played the updated version of this game on mobile compared to flash, I think it's worth the 5 bucks to play. I'm currently enjoying myself quite a bit.. So i feel like is a dlc for the first game but its ok i mean you play as a redhead uff in ww2 yes.. Oh boy, more Last Dream.

So if you played the last game- It's very much more of the same, in a good way. They've clearly learned as they work on the series, and a lot of the rougher edges of the design have been improved this go-around. Levels and Dungeons seem to be better-designed this time, and they've clearly gotten their hands on a much wider array of tilesets and other assets, so the whole game feels very distinct both in telling regions apart from eachother, and like you'll never look at a screen and mistake it for something you saw in the first game. Oh, and the music is still sweet.

If you've never played the original- you can still play this game no problem, but you gotta get a sense of what you're trying to get into: This is a Zoning Out Game. This is a game where you've got some time to kill, and you just chill out and go for awhile. It's never going to grab you by the heart or get your adrenaline pumping, but if you have the right itch for it to scratch, you'll have a great time. I love these games, even as I understand that not everyone wants a zoning out game. If you do, give one of these ones a shot. If not, they're probably not for you, and that's fine.
